How to connect to a cellular hotspot.

When you need to connect to your cellphone's hotspot.

To connect to the hotspot:

1. Set up the hotspot on your cellular device. Follow your device's guide and make sure you confirm with your cellular provider that your plan allows for hotspots.
    1. Share a mobile connection by hotspot or tethering on Android
    2. How to set up a Personal Hotspot on your iPhone or iPad
2. On your laptop, select the option to connect to Wi-Fi.
3. Locate your hotspot's name in the Wi-Fi list.
4. Connect to your hotspot like you would any Wi-Fi connection.

NOTE:

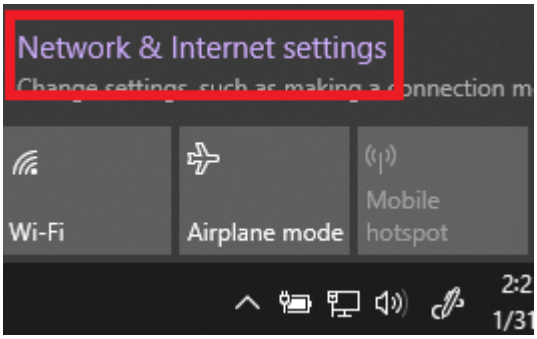

The **Mobile Hotspot** option in Window's Network & Internet setting is **NOT** use to connect to your cellular hotspot. This is used to turn your laptop into a hotspot. College laptops do not allow this option and are correctly blocked.

Forgetting previous WiFi.

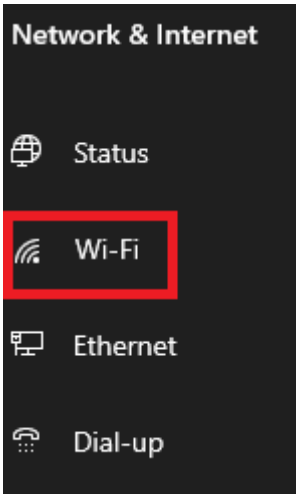

Occasionally when you are unable to connect to a WiFi network, it may be do to your device having to many saved WiFi connections. You can delete networks (such as hotels and airports) that are no longer in use to free up space.

1.) Open up **Network and Internet settings**

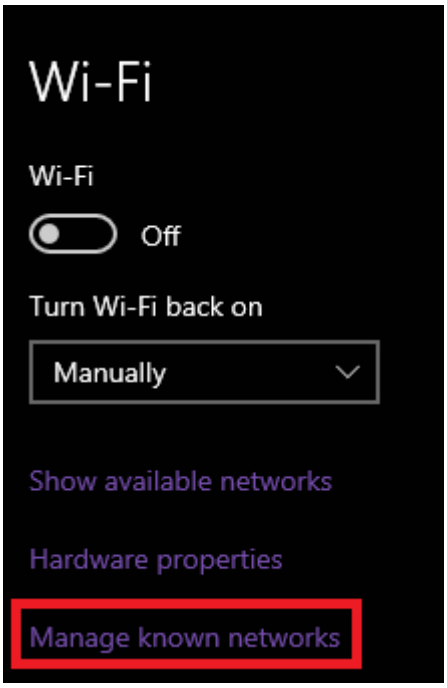

2.) Click on **WiFi**

3.) Click on **Manage known networks**

4. Select the WiFi Network you wish to remove then click **Forget.**
