

How to find Shared Drives.

If you cannot locate your shared drives, or if the shared drives appear to be missing.

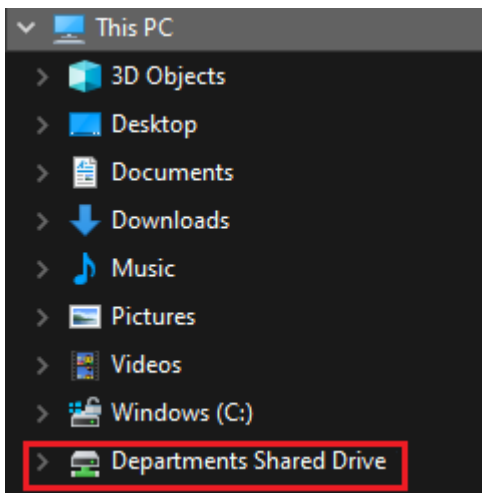

1) Select the **File Explorer** icon at the bottom of your taskbar.

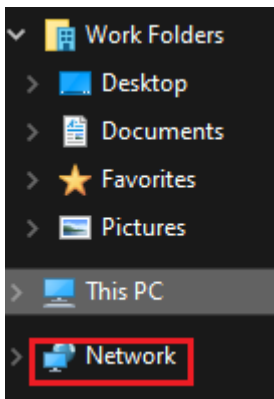

3) Your shared drives will show up under the **Network locations** section. Clicking on the share you want will bring you to the files in that share.

If you selected to expand **This PC** it will show up near the bottom of the list.

NOTE: The section labeled **NETWORK** is **NOT** connected to the shared drives and is **NOT** how to access the drives. Please do not try to use this to access the shared drives.
