

Restoring files and folders.

Most files and folders can be restored from previous dates/saves.

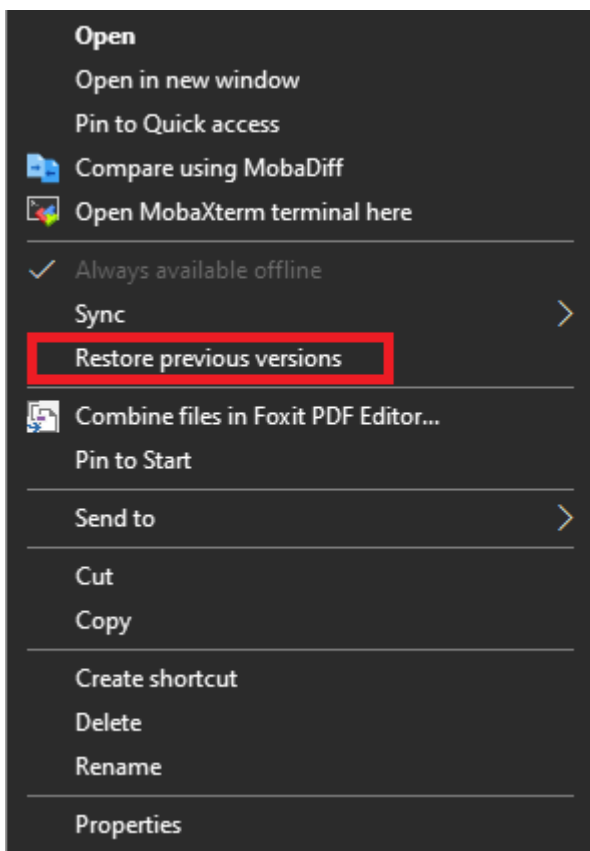

This is helpful if you made saves to a document that you need to fix or if you deleted a file from a folder that you need again.

Currently you can only restore from about 1 week prior.

1.) Select the file or folder you wish to restore.

SMART Notebook	1/9/2023 2:32 PM	File folder
Smart Touch	8/19/2022 8:48 AM	File folder
Training Guides	6/6/2023 4:43 PM	File folder
WindowsPowerShell	6/28/2022 2:32 PM	File folder
Zoom	12/2/2022 6:36 PM	File folder

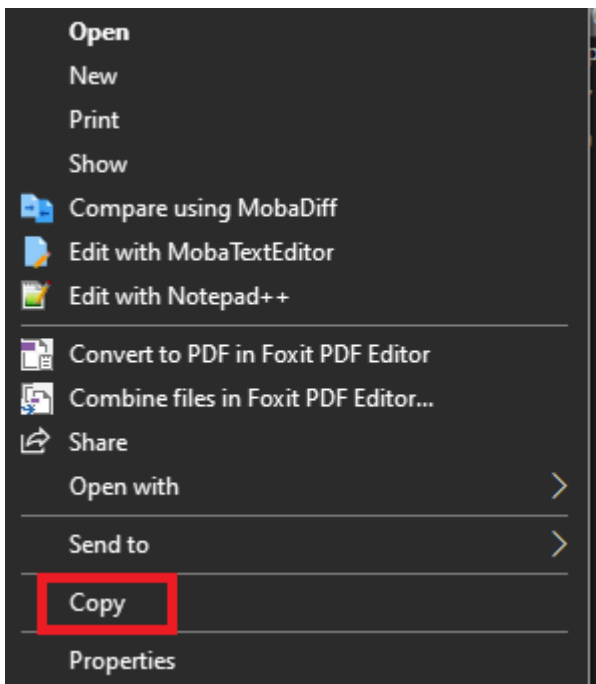

2.) Right click on the folder and select **Restore previous versions**.

3.) Select when you want to restore from. Click **Open**.

4.) Right click and copy/paste the file you to the folder you want to restore to.

5.) Click **OK** to exit the properties box.

Anything needed that is more than a week old will need a helpdesk ticket.
